

# Inner lining: thermoplastic Polyurethane

# **Exterior:** thermoplastic Polyurethane

### Jacket:

100 % Polyester high tenacity yarn, circular woven

## **Applications:**

liquid manure distribution

# PARSCH TPU

# layflat hose for liquid manure distribution

### Characteristics:

extremely high abrasion resistance, very long service life, ageing and ozone resistant, requires no drying after use

### **Temperature:**

cold resistant to - 30 °C heat resistant up to + 100 °C (temporarily higher)

inner diameter mm	inner diameter inch	weight approx. g/m	burst pressure bar	working pressure* bar	wall thickness mm	tear strength kg
102	4	900	50	17	3,50	16.000
115	4 1/2	1000	40	14	3,50	18.500
125	5	1700	40	14	3,50	19.800
152	6	2000	40	14	3,80	27.000
204**	8	3000	40	14	3,80	36.000

\* Maximum recommended working pressure of the hose or maximum working pressure of the attached couplings whichever is the lower.
