

Inner lining:

thermoplastic Polyurethane

Exterior:

thermoplastic Polyurethane

Jacket:

100 % Polyester high tenacity yarn,
circular woven

Applications:

liquid manure distribution

PARSCH TPU

layflat hose for liquid manure distribution

Characteristics:

extremely high abrasion resistance, very long service life, ageing and ozone resistant, requires no drying after use

Temperature:

cold resistant to - 30 °C
heat resistant up to + 100 °C (temporarily higher)

inner diameter mm	inner diameter inch	weight approx. g/m	burst pressure bar	working pressure * bar (2:1)	working pressure * bar (3:1)	wall thickness mm	tear strength kg
102	4	900	50	25	17	3,50	16.000
115	4 1/2	1000	40	20	13	3,50	18.500
125	5	1700	40	20	13	3,50	19.800
152	6	2000	40	20	13	3,80	27.000
204 **	8	3000	40	20	13	3,80	36.000

* Maximum recommended working pressure of the hose or maximum working pressure of the attached couplings whichever is the lower.

** Available in black only
